

Offender Failure Rates/Recidivism

- Excluding release with services, of offenders released from CBC field supervision in FY2004, 21% were unsuccessful (usually revoked).
- For every unsuccessful offender in FY2004, **3.4 offenders were successfully discharged.**
- CJJP is currently studying recidivism rates for probationers. Their studies of parolees over the years document that offenders released in more recent years are less likely to return to prison than those released in the past.

**Rates of Return to Prison
FY90, FY96, FY98 & FY2000 Releases**
